Keyword: Software Helps

Abstract:

Number of issues arising in connection with the efficiency and maintenance of a file / disk at large, and the development of computer technology along with its software, causing the software can not be excluded anymore. Because so many types of assistive software available, in this paper focuses on two research software that is very popular in Indonesia, namely PC Tools Deluxe Version 5.5 and Norton Utilities Advanced Edition Version 4.5. Activities include surveys and interviews conducted with several users who have enough experience in the use of both the software earlier. After obtaining the problem, gathered the abilities possessed by each of the software and compared. From the comparison results can be perceived advantages and disadvantages of each, and should be used is unknown when Toos PC Deluxe 5.5 and when used Norton Utilities Advanced Edition 4.5.
