Keywords: Visual Basic 6.0 programming language

**Abstract:**

Calculation of Inheritance in Islam in the control of Al-Quran and Al-Hadith in detail and clear and the rules are created directly by God Almighty that the truth is not in doubt, do not like the law that created by humans which so many flaws and weaknesses. Which raised the feeling of dissatisfaction that ultimately arise the problems that are not in want. Calculation of the legacy by using the computer will be easier and the results will be quicker.
