Keyword: Digital Control Systems, Audio, Lighting

Abstract:

The digital control system will make memorable house was inhabited, although abandoned for a few days. This control system worked as long as 24 hours a day by making use of changes in light intensity.

The digital control tool can be ignited or extinguished in accordance with the desire of user. These tools provide the means to control multiple electrical devices that ignited and extinguished on a certain day such as lighting, television, tape recorder or the radio. For tape recorders to be used can be filled with an assortment of sound effects sound like little children crying, the sound the rooster crows, the sound of someone taking a bath and others.
