Abstract:
Statistics show that each year a robbery in our country growing, the robbers did not hesitate to commit an act of violence against his victims even to commit murder. Most robberies occur by opening a door or window with one way. The simplest way to combat this robbery is by preventing the open door or window with a lock.

To reduce the increase in robberies of symptoms that often occur in our country especially in major cities, the author wants to put forward a robbery alarm system. Not a professional and expensive, but a simple and inexpensive system, but very able to prevent the robbery and the robber so shocked and terrified him to cancel his intention to conduct the robbery.
