ABSTRACT

In order to improve the quality of a high school graduate / vocational school, various efforts have been made by the respective - respective schools in order to improve the quality of these graduates. This effort is intended to improve the quality of education. Which in turn can improve the academic quality of universities, whereby universities receive only qualified applicants. Evaluation of the monitoring process is carried out continuously and continuous in the end will be able to fix the quality of education. One effort is developing a management information system design problem tryout. With the availability of information about the tryout system was expected that users can perform a variety of analysis and also can provide a more accurate exam. Development of information system design is intended as a first step in increasing the academic quality of universities.

Keywords: information system design, tryout, database problem
