Abstract

A company in its financial activities will certainly make a record that serves to record all types of proof of transactions that will be used in a certain period or commonly referred to as general journals. This is an important activity in the financial part of the company because if the recording of transaction evidence can be done properly, it will be able to provide detailed information about changes in economic resources that occur due to activities carried out by the company in order to gain profits, therefore proof of transaction must be stored properly so that when errors occur and errors can be used. By using online accounting software can make it easier to record and analyze general journals and at the same time as a solution to avoid financial manipulation, thus recording general journal activities will be more effective and efficient and safer than still using manual or offline recording.

Keywords: *online accounting software, recording, general journal*

1. Introduction

In a company in its financial activities will certainly do a record that serves to record all types of proof of transactions that will be used in a certain period [1].

A general journal is an activity of recording transactions that are recorded according to the time of occurrence of the transaction [2] so that the general journal has a role that can describe the activities of the company every day in a month [3] and if the general journal can be managed properly it can have a different function that can provide information informative finance through recording transactions carried out with these explanations [4][12] this can be said to be an important activity in the financial part of the company.

In recording and analyzing the general journal activities, security must be ensured so there will be no financial manipulation that can harm the company [5] because there are many who misuse it. To simplify recording and analyzing general journals, the accounting system can be used wherever and whenever [6], [13] by connecting the internet so that you do not have to have a lot of backing up with a good internet connection [7], everything can be accessed without complicating company employees and this can also save time because only once the work can be accessed anywhere and anytime [8], [14]. The system function is used to fulfill an obligation arising from a transaction activity [9].

The general journal menu serves to record specific company bookkeeping. To access this menu, click the list of accounts in the menu on the left for general journal creation. that is, as shown below:

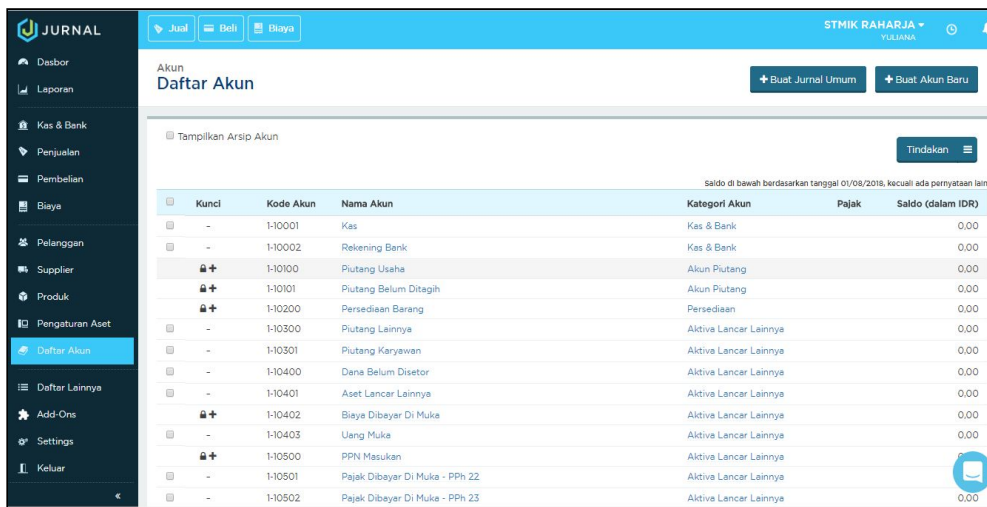

Figure 1. Display Menu Account List

2. Results and Discussion

In the process of recording and analyzing the company's general journal will be easier and the work will be more efficient and effective by using online accounting software [10],[15] that can be accessed anywhere and anytime. There are several steps that must be taken when you want to access online accounting software to record and analyze general journals.

2.1 Create a General Journal

When you want to make a general journal, select the account list menu and select + Create general journal, it will be directed to a new journal form

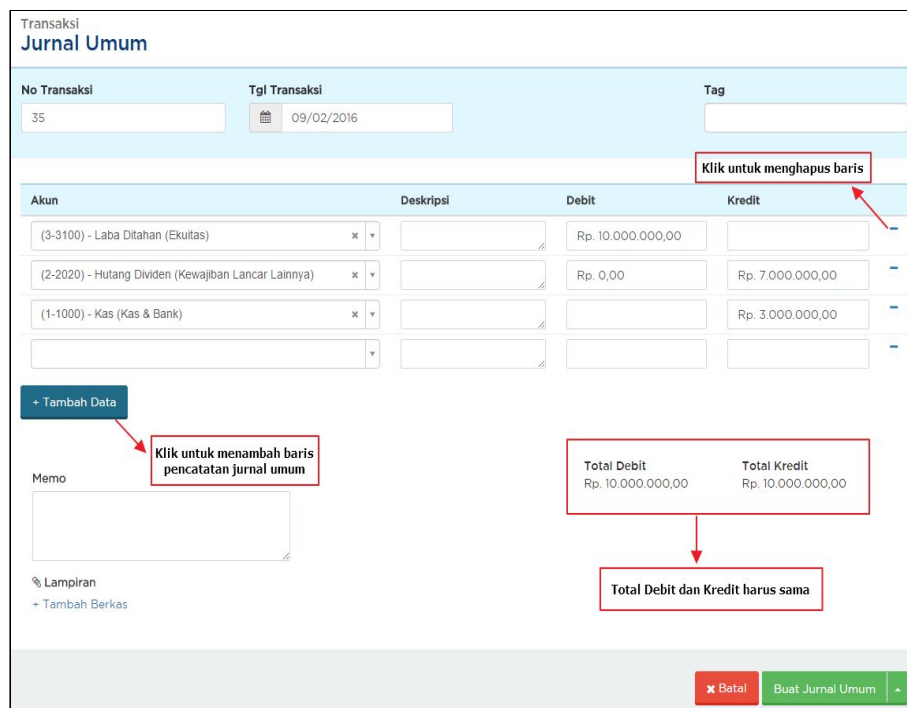

Figure 2. Display of New Journal Form

- a. +add new : to add a new line for recording general journals
- b. (-) : to delete rows
- c. Total Debits and credits must be the same
- d. No Transaksi : The number to be assigned and ordered automatically by the system, but in this case can be changed as desired. This transaction number will make it easier for employees to track transaction data.
- e. Date Transaction : Select transaction date according to journal creation date
Tag: This field works for filters.
- f. Account: Select the account you'd like to record as a debit or as a credit. For paying accounts, note the Credit column. For accounts that accommodate charges / fees, they can be recorded in the Debit column.
- g. Description: Enter a charge description. Example: Electricity cost;
- h. Debit: Enter the debit balance
- i. Kredit: Enter credit balance
- j. Memo: Provide information where necessary

2.2 Printing the General Journal

If a new journal has been successfully created, then online accounting software can also print general journals[11], as follows:

- a. Select the print & preview button and select the preview journal entry as shown below
