## PENJELASAN

### I. PENDAHULUAN

#### 1.1 Latar Belakang

1. Sensus penduduk adalah keseluruhan proses pengumpulan, pengolahan, diseminasi, dan analisis data demografi yang menyangkut semua penduduk suatu teritorial negara atau suatu wilayah pada waktu tertentu. Proses pengumpulan data sensus penduduk biasa juga disebut pencacahan penduduk (cacah jiwa), yang artinya petugas mengunjungi dan mewawancarai seluruh penduduk untuk menghitung penduduk serta memperoleh keterangan demografi maupun sosial ekonomi. Keterangan yang dikumpulkan mencakup: umur, jenis kelamin, pendidikan, agama, suku bangsa, kewarganegaraan, ketenagakerjaan, fertilitas, mortalitas, migrasi, dan fasilitas perumahan.

2. Hasil sensus penduduk adalah data jumlah penduduk menurut karakteristik demografi dan sosial ekonomi, yang sangat berguna sebagai bahan perencanaan dan evaluasi pembangunan serta juga sebagai sumber ilmu pengetahuan. Data sensus dapat memberikan gambaran secara aktual

mengenai kondisi penduduk, perumahan, pendidikan dan ketenagakerjaan sampai wilayah administrasi terkecil. Dari Sensus Penduduk tahun 2010 (SP2010) diperoleh data dan informasi yang dipakai menghitung parameter demografi, basis proyeksi, berbagai statistik wilayah kecil, dan sumber data pelaksanaan berbagai program kegiatan pembangunan. Pentingnya SP2010 digambarkan sebagai kegiatan yang tidak tergantikan dengan kegiatan statistik lainnya.

3. Data statistik kependudukan hasil SP2010 yang dapat disajikan sampai wilayah administratif terkecil sangat berguna bagi perencanaan pembangunan serta merupakan data yang sangat ditunggu dan diharapkan oleh semua pihak. Sampai saat ini hasil registrasi penduduk belum dapat menghasilkan data kependudukan seperti yang diharapkan, yang mampu memberikan gambaran keadaan penduduk Indonesia. Oleh karena itu hasil SP masih merupakan satu-satunya data kependudukan yang dapat disajikan sampai tingkat desa/kelurahan.

4. Sejak Indonesia merdeka, sensus penduduk telah dilakukan enam kali, yaitu pada tahun: 1961, 1971, 1980, 1990, 2000 dan 2010. Sesuai dengan amanat Undang-undang Nomor 16 Tahun 1997 Pasal 8 Ayat 1 yang menghendaki agar sensus

penduduk di Indonesia diselenggarakan paling tidak sekali dalam setiap 10 tahun dan sejalan pula dengan rekomendasi Perserikatan Bangsa-Bangsa (PBB).

5. Rangkaian kegiatan SP2010 telah dimulai sejak tahun 2007 dan seluruh kegiatan akan berakhir pada tahun 2013. Kegiatan SP2010 diawali dengan pendataan Potensi Desa (PODES), kemudian dilanjutkan dengan pemetaan wilayah administrasi dan wilayah Blok Sensus (BS), uji coba instrumen, dan kegiatan-kegiatan lainnya yang berhubungan dengan perencanaan dan persiapan. Pada 2009 dilaksanakan gladi bersih untuk menguji kelayakan operasional seluruh instrumen, prosedur, dan sistem yang akan digunakan dalam SP2010. Puncak kegiatan SP2010 adalah pada Mei tahun 2010 yaitu dilaksanakannya pendaftaran bangunan dan rumah tangga dan pencacahan lengkap seluruh penduduk.

6. Kegiatan lapangan SP2010 dilaksanakan di seluruh wilayah administrasi Indonesia kondisi November 2009, meliputi: 33 provinsi, 497 kabupaten/kota, 6.651 kecamatan, dan 77.126 desa/kelurahan. Selain di dalam wilayah geografis itu dilakukan sensus terhadap duta besar atau diplomat perwakilan RI di luar negeri pendataan melalui *e-census* (email dan website).

7. Petugas yang direkrut untuk pelaksanaan lapangan ada sekitar 700.000 orang sebagai pencacah, koordinator tim, dan koordinator lapangan. Pelatihan Petugas diselenggarakan di tingkat kecamatan atau kabupaten/kota difasilitasi dalam 35.000 kelas selama 3-4 hari efektif oleh instruktur (daerah dan nasional) yang sudah dilatih sebelumnya. Pelatihan dimaksudkan sebagai forum pembentukan keterampilan mencacah dengan menggunakan instrumen yang sudah disiapkan, yang bertujuan menjaga kualitas data yang dikumpulkan.

8. Kegiatan lapangan dan pengolahan data telah selesai untuk karakteristik pokok maupun karakteristik lainnya. Pengolahan ini menghasilkan angka final jumlah penduduk beserta karakteristiknya secara lengkap mulai dari tingkat desa, kecamatan, kabupaten/kota, provinsi, dan nasional. Publikasi ini merupakan hasil akhir pengolahan data dari kegiatan pencacahan lengkap SP2010.

## **1.2. Tujuan SP2010**

9. Tujuan SP2010 secara umum adalah:

- 1) Mengumpulkan dan menyajikan data dasar kependudukan sampai wilayah administrasi terkecil.
- 2) Membentuk Kerangka Sampel Induk (KSI) untuk kepentingan survei-survei lain yang dilakukan dengan pendekatan rumah tangga.
- 3) Memperkirakan berbagai parameter kependudukan sampai wilayah administrasi tertentu.
- 4) Mengumpulkan informasi kependudukan yang dapat digunakan/dimanfaatkan untuk penyusunan basis data kependudukan.

## **1.3. Landasan Hukum**

10. Pelaksanaan SP2010 didasarkan pada:

- 1) Undang Undang Nomor 16 tahun 1997 tentang Statistik.
- 2) Peraturan Pemerintah Nomor 51 Tahun 1999 tentang Penyelenggaraan Statistik.
- 3) Peraturan Presiden Nomor 86 Tahun 2007 tentang Struktur Organisasi BPS.

## **1.4. Cakupan dan Kegiatan**

11. SP2010 mencakup seluruh penduduk warga negara Indonesia (WNI) maupun warga negara asing (WNA) yang tinggal dalam wilayah teritorial Indonesia, baik yang bertempat tinggal tetap maupun yang tidak tetap, termasuk anggota korps diplomatik RI beserta anggota rumah tangganya yang berada di luar negeri. Penduduk yang bertempat tinggal tidak tetap antara lain tuna wisma, pengungsi, awak kapal berbendera Indonesia, suku terasing, dan penghuni perahu/rumah apung.

## **1.5. Jadwal Kegiatan untuk Tahun 2009 dan 2010**

12. Kegiatan lapangan SP2010 meliputi:

- 1) Pemetaan wilayah administrasi dilakukan pada tahun 2008 dan 2009.
- 2) Pembentukan dan pemetaan Blok Sensus (BS) dilakukan pada tahun 2008 dan 2009. Peta BS akan digunakan untuk penentuan wilayah kerja petugas sensus dan pemetaan lokasi bangunan.
- 3) Pendaftaran bangunan dan rumah tangga (listing) pada bulan sensus yaitu pada tanggal 1-7 Mei 2010.

- 4) Pengumpulan data penduduk yang bertempat tinggal tetap dilaksanakan pada tanggal 8-31 Mei 2010.
- 5) Pengumpulan data penduduk yang bertempat tinggal tidak tetap khusus tunawisma dan anak buah kapal dilaksanakan pada tanggal 15 Mei 2010 mulai jam 24.00. Tanggal 15 Mei 2010 merupakan **Hari Sensus**. Pengumpulan data penduduk yang bertempat tinggal tidak tetap atau lokasi khusus lainnya dilaksanakan tanggal 1 – 31 Mei 2010.

## II. METODOLOGI DAN TAHAPAN KEGIATAN LAPANGAN

### 2.1 Metodologi

13. Pada dasarnya sensus penduduk bertujuan untuk: (1) menghitung stok atau jumlah penduduk suatu negara di seluruh wilayah teritorial negara pada suatu titik waktu (hari) tertentu, dan (2) mengumpulkan data karakteristik kependudukan dan karakteristik sosial ekonomi penting (yang secara statistik sulit/tidak akurat dikumpulkan melalui survei), misalnya agama, suku bangsa, dan kecacatan.

14. Pencacahan penduduk menggunakan konsep “*usual residence*” atau konsep “dimana seseorang biasanya menetap/bertempat tinggal” untuk penduduk yang bertempat

tinggal tetap, sehingga mereka akan dicacah dimana mereka biasanya bertempat tinggal. Penduduk yang sedang bepergian 6 bulan atau lebih, atau yang telah berada pada suatu tempat tinggal selama 6 bulan atau lebih, dicacah dimana mereka tinggal pada saat pencacahan. Penduduk yang menempati rumah kontrak/sewa (tahunan/bulanan) dianggap sebagai penduduk yang bertempat tinggal tetap. Sedangkan untuk penduduk yang bertempat tinggal tidak tetap akan dicacah dimana mereka ditemukan pada saat malam sensus.

15. Pencacahan penduduk dalam SP2010 dilakukan dengan cara sebagai berikut:

- 1) Penduduk yang bertempat tinggal tetap di wilayah yang telah dicakup dalam pemetaan (termasuk tempat tinggal biasa, apartemen, rumah susun, dan perumahan elit) akan dicacah dengan daftar L1 dan daftar C1. Kegiatan ini dilakukan oleh tim.
- 2) Penduduk yang bertempat tinggal tetap di wilayah lain (mencakup: masyarakat terpencil, penghuni rumah perahu, dan diplomat beserta anggota rumah tangganya di luar negeri) dicacah dengan daftar C2. Kegiatan ini dilakukan oleh petugas khusus atau *task force* (TF).

3) Penduduk yang bertempat tinggal tidak tetap (mencakup: tuna wisma, awak kapal berbendera Indonesia, suku terasing, penghuni penjara, penghuni barak militer, pengungsi di tenda penampungan, dsb) akan dicacah dengan daftar L2. Khusus untuk pencacahan tuna wisma dan awak kapal berbendera Indonesia dicacah serentak pada tanggal 15 Mei 2010. Kegiatan ini dilakukan oleh TF yang dikoordinir oleh BPS Kabupaten/Kota.

## **2.2 Tahapan Kegiatan Lapangan**

16. Pencacahan lapangan meliputi kegiatan listing dan pencacahan lengkap. Sebelum memulai listing, tim diwajibkan untuk menelusuri seluruh wilayah kerjanya dan mengidentifikasi batas-batas, serta menyesuaikan peta WB dengan keadaan lapangan.

### **2.2.1 Rapat Persiapan**

17. Setelah pelatihan dan sebelum orientasi lapangan perlu diadakan rapat persiapan antara Kortim dan anggotanya yang membahas antara lain:

- 1) Strategi lapangan secara umum, termasuk penelusuran wilayah kerja secara bersama-sama, listing dan pencacahan lengkap.
- 2) Pengecekan kelengkapan dokumen dan perlengkapan petugas.
- 3) Penyusunan jadwal kerja tim dan jadwal pertemuan di lapangan.
- 4) Strategi menyelesaikan tugas sesuai jadwal dan sesuai kontrak.

### **2.2.2 Penelusuran Wilayah Kerja**

18. Penelusuran wilayah kerja dilaksanakan oleh tim sebelum melakukan listing dengan tahapan kegiatan seperti berikut ini:

- 1) Tim menelusuri wilayah kerja dengan membawa peta WB.
- 2) Mengenal kesesuaian batas-batas, *landmark*, dan legenda pada peta dengan keadaan sesungguhnya di lapangan. Perhatikan berapa jumlah SLS di BS tersebut, apakah BS tersebut terdiri dari gabungan SLS, pecahan SLS atau satu SLS.
- 3) Jika ditemui ketidaksesuaian antara peta WB dengan keadaan di lapangan maka perbaiki peta dan laporkan ke Korlap/KSK. Perbaikan peta WB meliputi perbaikan/

penambahan jalan, gang, sungai atau unsur lainnya. Jika batas BS atau SLS kurang jelas, perbaikan batas dilakukan pada BS atau SLS tersebut dan pada BS atau SLS yang bersebelahan. Laporkan kepada Korlap/KSK jika ada kesalahan prinsip pada BS untuk diputuskan penyelesaiannya.

- 4) Periksa ketepatan posisi *landmark* (bangunan yang mudah dikenali sebagai batas) dan tambahkan *landmark* pada batas SLS dan BS lain yang merupakan batas luar.
- 5) Tim merencanakan kegiatan listing dengan cermat agar bangunan dan rumah tangga dalam BS tersebut tidak terlewat cacah atau tercacah lebih dari sekali. Hal-hal penting yang direncanakan adalah:
  - a. Mengenali seluruh seluk beluk wilayah kerja.
  - b. Penentuan posisi pasti bangunan pertama di ujung Barat Daya.
  - c. Penentuan arah *zig zag* atau mulai dari bangunan mana lalu ke mana selanjutnya dan berakhir di mana.
  - d. Jika satu BS terdiri dari beberapa SLS, perlu direncanakan juga “titik” bangunan mana kelanjutan pada SLS berikutnya.
  - e. Kortim memberi arahan apabila ditemukan keraguan atau masalah untuk dilaksanakan PCL. Misalnya ada bangunan yang letaknya meragukan masuk SLS mana,

maka saat perencanaan ini sudah diputuskan yang paling baik dimasukkan ke SLS mana. Misalnya ada batas SLS yang tidak jelas, maka pada saat penelusuran semua sudah ditegaskan.

- f. Memperkirakan kapan selesai listing pada masing-masing BS.
- g. Dimana tim akan mengadakan pertemuan wajib atau pertemuan yang dibutuhkan.
- h. Melengkapi peta WB dengan jalan atau gang yang belum tergambar.
- i. Menemui Ketua lingkungan (SLS) dan melaporkan rencana garis besar kegiatan.
- j. Jika ada kesempatan, manfaatkan kesempatan itu untuk menjelaskan kepada masyarakat bahwa sensus akan dimulai.
- k. Melakukan identifikasi karakter masyarakat dan menyusun rencana untuk menyesuaikan diri.

### 2.2.3 Listing

19. Listing terdiri dari tiga kegiatan, yaitu pendaftaran bangunan dan rumah tangga, penggambaran letak/posisi bangunan fisik pada peta WB, dan penempelan stiker pada bangunan fisik/bangunan sensus.

20. Seorang PCL melakukan listing semua bangunan yang berada di setiap BS dengan menggunakan daftar L1. Listing dimulai dari bangunan yang berada di sebelah Barat Daya BS dan dilanjutkan secara *zig zag* menuju ke arah Timur.

21. Dalam listing dikumpulkan keterangan mengenai nama satuan lingkungan setempat (SLS), nomor urut SLS, nomor bangunan fisik, nomor bangunan sensus, jenis bangunan sensus, penggunaan bangunan sensus, nomor rumah tangga, nama kepala rumah tangga (KRT), jenis rumah tangga (biasa/khusus), dan jumlah anggota rumah tangga (ART) menurut jenis kelamin.

#### 2.2.4 Pencacahan Lengkap

22. Setelah listing seluruh BS selesai, kegiatan tim dilanjutkan dengan mencacah seluruh ART dalam rumah tangga dengan daftar C1. Semua pencacah lapangan (PCL) dalam tim mencacah bersama-sama dalam suatu BS. Satu rumah tangga dicacah secara terpisah oleh satu PCL.

23. Dalam pencacahan lengkap dikumpulkan keterangan mengenai nama ART, hubungan dengan KRT, jenis kelamin, umur, agama, kecacatan (*functional disability*), suku bangsa, bahasa, migrasi, pendidikan, status perkawinan, ketenagakerjaan, fertilitas, mortalitas, dan fasilitas perumahan.

#### 2.2.5 Evaluasi dan Pemeriksaan Bersama (*Cleaning*)

24. Rancangan pencacahan dengan tim ditujukan untuk memastikan data sudah *clean* di lapangan. Selesai pencacahan oleh PCL, dokumen langsung diperiksa oleh Kortim. Formasi dan prosedur kerja petugas di lapangan, dibuat sedemikian rupa supaya tujuan mendapatkan data *clean* di lapangan bisa terwujud.

25. Meskipun pencacahan secara tim, masih ada potensi tidak *clean*-nya data karena berbagai hal. Misalnya, terlalu konsentrasi pada koding sehingga konsistensi terlewatkan, membiarkan penumpukan dokumen sehingga pemeriksaan tidak cermat, atau karena cara kerja yang tidak efektif (tidak mengikuti jadwal).

26. Dalam upaya memastikan dokumen *clean* di lapangan maka dipandang perlu melakukan dua (2) tahapan "*cleaning*" atau "*Netting*", sebelum dokumen diserahkan ke BPS Kabupaten/Kota. *Cleaning* yang pertama adalah di dalam tim, dimana sesama PCL memeriksa silang hasil pekerjaan temannya satu tim. *Cleaning* yang kedua adalah di dalam Korlap, dimana sesama Kortim memeriksa silang, Kortim yang satu memeriksa ulang hasil pekerjaan Kortim yang lain.

### III. KONSEP DAN DEFINISI

#### 3.1 Penduduk

27. Pendekatan yang digunakan untuk mendefinisikan penduduk dalam SP2010, seperti halnya dalam sensus-sensus penduduk sebelumnya menggunakan konsep “*de jure*” atau lebih tepatnya konsep “tempat dimana biasanya seseorang menetap/tinggal” (*usual residence*) untuk **penduduk yang bertempat tinggal tetap**. Menurut konsep ini penduduk suatu wilayah adalah mereka yang biasanya tinggal di wilayah itu.

28. Penduduk yang **disensus dilokasi khusus** meliputi: Asrama Mahasiswa, Pondok Pesantren, Panti Asuhan, Barak Militer, Barak Pekerja Perusahaan, Penjara, Rumah Sakit Jiwa, Suku Terasing, Awak Kapal, Tunawisma, dll.

## **EXPLANATORY NOTES**

### **I. INTRODUCTION**

#### **1.1 Background**

1. Population census is the entire process of collecting, processing, dissemination, and analysis of demographic data concerning all the inhabitants of a territorial state or a region at any given time. The process of population census data collection is often called the enumeration of the population (census), which means field officers visit and interview the entire population to calculate the population as well as obtain demographic and socioeconomic information. Information collected includes: age, sex, education, religion, ethnicity, citizenship, employment, fertility, mortality, migration, and housing facilities.

2. The results from population census are data of population by demographic and socioeconomic characteristics, which are very useful as a material planning and evaluation of development and also as a source of knowledge. Census data can provide the actual picture of the conditions of the population, housing, education, and employment to the smallest level

administrative area. From the Indonesia's 2010 Population Census (SP2010) can be obtained data and information that can be used to calculate demographic parameters, baseline projection, a variety of small area statistics, and source of data for the implementation of various development program activities. The importance of SP2010 described as activities that cannot be replaced by the other statistical activities.

3. Population data statistics from SP2010 which can be presented until the smallest administrative area is very useful for development planning as well as the data is awaited and expected by all parties. Until now, the population registration have not been able to generate population data as expected that is able to provide an overview of Indonesia's population. Therefore, Population Census is still the only population data that can be presented to the village.

4. Since Indonesia's independence, the population census has been conducted six times, namely in the year: 1961, 1971, 1980, 1990, 2000 and 2010. In accordance with the mandate of Act No. 16 of 1997 Article 8 Paragraph 1, which calls for population census in Indonesia should be held at least once in every 10 years and also in line with the recommendations of the United Nations (UN).

5. SP2010 series of activities have been initiated since 2007 and all activities will end in 2013. SP2010 activities was began with data collection Village Potential (Podes), then followed by mapping the administrative area and Census Blocks (BS), testing the instruments, and other activities associated with planning and preparation. In 2009, dress rehearsals have been conducted twice to test the operational feasibility of the instruments, procedures, and systems that will be used in the SP2010. The final activity of SP2010 was in May of 2010 which was the building and household registration (listing) and the complete enumeration of the population.

6. SP2010 fieldwork carried out in all administrative areas in Indonesia at the condition of November 2009, including: 33 provinces, 495 districts, 6651 sub-districts and 77,126 villages. In addition to that, it has been also conducted the census of the ambassadors or diplomatic representatives of Indonesia residing abroad through e-census (using email and website).

7. Field officers recruited for the implementation of the field activities were about 700,000 people as enumerators, team coordinator, and field coordinator. Training of the field officers was held at the sub-district or district level, facilitated in 35,000 classes in 3-4 days effective by the instructor (regional and national) that

have been previously trained. Training is intended as a forum to equip field officers with adequate enumerating skills using instruments that had been prepared, in order to maintain the quality of data collected.

8. The fieldwork and data processing have been completed for the main characteristics (sex and age), while other characteristics of data are still in evaluation stage of the final validation. This data processing produces the final figures of the complete population from the village, sub-district, district, provincial, and national levels. The next stage is the dissemination of the final result of SP2010. Therefore, this publication is the final result of data processing from the SP2010 complete enumeration activities that have been carried out in stages.

## **1.2. The Purposes of Indonesia's 2010 Population Census**

9. The General Purposes of Indonesia's 2010 Population Census are:

- 1) Collecting and presenting basic demographic data up to the smallest level of administrative areas.

- 2) *Developing a Master Sampling Frame (KSI) that can be used as the basis for the other surveys conducted based on households approach.*
- 3) *Estimating the various demographic parameters until certain administrative areas.*
- 4) *Collecting demographic information that can be used/utilized for the preparation of the establishment of population database.*

### **1.3. Legal Basis**

10. *The implementation of SP2010 are based on:*

- 1) *Act No.16 of 1997 on Statistics.*
- 2) *Government Regulation No. 51 of 1999 on Statistics.*
- 3) *Presidential Decree No.86 of 2007 regarding the Organizational Structure of BPS.*

### **1.4. Scope and Activities**

11. *SP2010 covers the entire population of citizens of Indonesia (WNI) as well foreigners (WNA) who live in the territory of Indonesia, either permanent residence or those without permanent residence (homeless people), including members of the Indonesia diplomatic corps and their household members residing abroad. Residents without permanent residence, among*

*others, are homeless people, refugees, Indonesian-flagged vessel crews, tribal, and residents of boat / floating house.*

### **1.5. The Schedule of Field Activities for Year 2009 and 2010**

12. *SP2010 field activities include:*

- 1) *Mapping of the administrative area conducted in 2008 and 2009.*
- 2) *The developing and mapping of census blocks (BS) have been conducted in 2008 and 2009. The census block maps will be used for determining the working area of the census and mapping the location of the building.*
- 3) *Registration of building and household (listing) was carried out in the first week of census month, which is 1- 7 May 2010.*
- 4) *The collection of data on population who have permanent residence was carried out on 8-31 May 2010.*
- 5) *The collection of data on population who do not have permanent residence (homeless and the ship crew) was held on 15 May 2010 starting at 24.00. 15 May 2010 (Census Day). The collection of data on population who do not have permanent residence in other locations was held in 1-31 May 2010.*

## **II. METHODOLOGY AND FIELDWORK STAGES**

### **2.1 Methodology**

13. Basically, the population census aims to: (1) calculate the stock or population of the entire territory of the country at some point in specific time (days), and (2) collect data on demographic characteristics and important socioeconomic characteristics (which are statistically difficult/inaccurate to be collected through surveys), for example, religion, ethnicity, and disability.

14. Enumeration of the population uses the concept of "usual residence" or the concept of "where someone usually stays/lives" for permanent resident population, so that they will be enumerated in where they usually reside. Residents who are traveling for 6 months or more, or who has been in a place and intend to stay for 6 months or more, were counted in where they live at the time of enumeration. Residents who contract / lease a house (annually/monthly) is considered as permanent residences. As for residents who are not permanent residence will be enumerated in where they are discovered during the census night.

15. The enumeration of population in the SP2010 were done in the following way:

- 1) The people who still reside in a region already covered by the mapping (including regular housing, apartments, flats, and elite residential) were enumerated with L1 and C1 questionnaires. This activity was carried out by the team.
- 2) Permanent residents residing in other regions (including: remote communities, residents of the house boat, and diplomats as well as the members of their households abroad) were enumerated with C2 questionnaire. This activity was carried out by special officers or task forces (TF).
- 3) Non Permanent Residents (includes: homeless, Indonesian-flagged vessel crews, tribal, prison, military barracks residents, refugees in tent camps, etc.) were enumerated with L2 questionnaire. As for homeless people and Indonesian-flagged vessel and crew, were counted simultaneously on May 15, 2010. This activity was carried out by the TF, which was arranged by BPS-Statistics in district level.

### **2.2 Fieldwork Stages**

16. Field enumeration includes building and household census (listing) and complete enumeration. Before listing stage, the team is required to canvas the entire working area and identify the borders, and adjust the WB maps with the condition in the field.

### **2.2.1 Preparation Meeting**

17. After training and before the field orientation should be a preparatory meeting between Kortim and its members to discuss among others:

- 1) The strategy for field orientation in general, including the canvassing of working area, listing and complete enumeration.
- 2) Checking the completeness of documents and equipments of the field officers.
- 3) The preparation of the team's work schedule and appointments in the field.
- 4) Strategies to complete the task strict to schedule and the contract.

### **2.2.2 Field/Area Orientation**

18. Field/area orientation is conducted by the team prior to listing with the following phases of activity such as:

- 1) The team encircle the working area with a block census map (WB map).
- 2) Recognizing the suitability of the boundaries, landmarks, and legends on the map with the real situation on the field. Take a notice about the amount of units of the local environment

(SLS) in the census block (BS), if BS is composed of combination of SLS, a part of SLS or one whole SLS.

- 3) If you encountered a mismatch between the WB map with the real condition on the field, then refine the map and report to Field Coordinator/Coordinator of Statistics in District level. The revision of WB map covers the repairment/alteration of the street, alley, river or other elements. If the boundaries of Census Block (BS) and Unit of Local Environments (SLS) are not really obvious, the revision of boundaries have to be done to the specified BS or SLS and the adjoint BS or SLS. Report to Field Coordinator/Coordinator of Statistics if there is any principle error in the BS boundaries.
- 4) Check the accuracy of the position of landmarks (the building is easily recognizable as the boundary) and add the landmarks on the boundary of SLS and other BS that is the outer boundary.
- 5) Team plan the listings carefully in order to avoid under counting or double counting of buildings and households in the BS. The important things that should be planned are:
  - a. Recognizing all the ins and outs of working area.
  - b. Positioning the first building on the edge of the Southwest.
  - c. Determine the zigzag direction or which building to start, the next direction and where will be ended.

- d. *If census block (BS) consists of several SLS, it is necessary to plan also the "point" where the continuation of the building next to the SLS.*
- e. *Team Coordinator (Kortim) gives directions if field enumerators (PCL) have any doubt or problems in the field. For example, there are doubts about the location of a building in the SLS, it should be decided in the preparation meeting. For example if there is no clear boundary in the SLS, it should be solved in the field orientation stage.*
- f. *Estimate the listing schedule for each BS.*
- g. *Where team will hold a mandatory meeting or meetings required.*
- h. *Completing the WB maps with street or alley that has not drawn yet.*
- i. *Meet with the Chairman of the unit local of the environment (SLS) and reports the outline plan of activities.*
- j. *If there is a chance, use that opportunity to explain to the public that the census will begin.*
- k. *To identify the character of society and devise a plan to adjust*

### **2.2.3 Listing**

19. *Listing consists of three activities, namely building and household registration, the delineation of the location / position of the physical structure on the WB map, and sticking stickers on the physical building / census building.*

20. *A field enumerator responsible to list all buildings which are in each BS by using the L1 questionnaire. Listing starts from the building in the southwest of BS and continues in a zigzag direction towards the East.*

21. *Information to be collected from listing are local environmental units (SLS), SLS sequence number, the number of physical building, census building number, type of census building, the use of census building, household number, name of household head (KRT), type of household (ordinary / special), and number of household members (ART) by sex.*

### **2.2.4 Complete Enumeration**

22. *After listing process of all the BS is completed, the team continue with enumerating all the ART in the household with C1 questionnaire. All field enumerators (PCL) in each team together enumerating in a BS. Each household was counted separately by a PCL.*

23. *In a complete enumeration collected information about the name of household members (ART), the relationship with the household head, sex, age, religion, disability (functional disability), ethnicity, language, migration, education, marital status, employment, fertility, mortality, and housing facilities.*

### **2.2.5 Evaluation and Data Cleaning**

24. *The design of the enumeration with the team aiming to ensure data is clean in the field. Completed enumeration by the PCL, the documents examined by Kortim directly. Formation and procedures for personnel working in the field, is made in such a way so that the purpose of obtaining clean data in the field could be realized.*

25. *Although the enumeration in the team, there's still a potency data are not clean for many reasons. For example, too much concentration on the coding, missing the consistency between questions, letting the pile of documents so that the examination is not accurate, or because of the working system is not effective (do not follow the schedule).*

26. *In an effort to ensure a clean document in the field it is necessary to do two (2) phases of "cleaning" or "Netting", before the documents submitted to the BPS Regency / Municipality. The*

*first cleaning is in the team, where all the field enumerators cross-checked the results of their work as a team. The second cleaning is in the Korlap, where all the Team Coordinators cross check each other job.*

## **III. CONCEPTS AND DEFINITIONS**

### **3.1 Population**

27. *The approach used to define the population in the SP2010, as in any previous census, the population census using the concept of "de jure" or more precisely the concept of "places where people usually live/live" (usual residence) for the permanent resident population. According to this concept a resident of a territory are those who usually live in the area.*

28. *Population census of the specific location including: student dormitory, boarding school, orphanage, Military Barracks, Barrack Company Workers, Prison, Mental Hospital, Isolated Tribe, Crew, Homeless, etc.*

29. *SP2010 also includes residents who reside not permanently. Enumeration of the population uses the concept of "de facto" or place where someone is at the time of enumeration.*

### **3.2 Census Block**

30. *In the normal population count SP2010 done with household approach. To ensure all households are covered, then the entire area of the village divided and mapped out into a small area units called census blocks. Census Blocks (BS) is a working area of enumeration, which is part of a region of villages.*

31. *Regular BS, has a charge of approximately 100 (minimum 80 and maximum 120) households/non residential census buildings (BSBTT)/empty residential census building (BSTTK) or a combination of all three in one plot (not separated by another BS), and to be estimated will not change within a period of approximately 10 years.*

32. *Special BS is the BS that went into its location limited access to the public, such as dormitories/barracks, dorm of nurses/students, boarding schools, orphanages with 100 inhabitants or more, and prison (unlimited inhabitants).*

33. *Preparation BS is an empty area separate from the settlement, such as rice fields, plantations, forests, swamps, including an empty area that has been planned to be used for local residential or business premises.*

### **3.3 Local Environmental Unit (SLS)**

34. *Local Environmental Unit (SLS) such as Neighborhood Organization (RT), Citizens Organization (RW), hamlet, ellipse, or the environment.*

### **3.4 Segment**

35. *Segments, namely the BS region that has clear boundaries (natural or artificial boundaries) like a river, street, alley and so forth. Area segments are not limited by the amount of the inhabitants but it clearly refers to the boundary.*

### **3.5 The content of BS/SLS/Segment**

36. *The content of BS/SLS/segment written in the form of KK/BSBTT/BSTTK (Estimated number of Head of Family/Non Residential Census Building/Vacant Residential Census Buildings). The content of segment written to each segment if the BS is a fraction of the SLS.*

### **3.6 Important Buildings**

37. **Important Buildings** such as village offices, health centers, mosques, small mosques, churches, temples, and other important buildings.

### **3.7 Landmark**

38. **Landmarks** can be a residential physical/census building or other marks on the field.

### **3.8 Physical Building**

39. **Physical building** is fixed and temporary shelters, which have walls, floors and roofs, both used for shelter and non shelter. Building a large floor less than 10 m<sup>2</sup> and is not used for residential buildings is not considered physically.

40. By type, the physical structure can not be distinguished on a single-storey buildings, single-storey buildings, buildings not articulated two-story, two-story building Trailers, Trailers many no-rise buildings, trailer many multistory buildings and single-storey building lots.

### **3.9 Census Building**

41. **Census Buildings** is a part or the whole physical building that has the exit/entry itself and is an integral function/use. For the home office (shop) or home stores (shop) which has its own gate, then the census count as a separate building.

42. According to the use of census building is divided into:

- 1) **The building housing census (BSTT)**, ie, census building wholly used for housing, including building designated as a place to live but not yet occupied (empty BSTT). Example: a housing complex that has not been inhabited.
- 2) **Non residential census building (BSBTT)**, ie, census building is not entirely used for shelter, such as shops, restaurants, salons, places of worship, hospitals, factories, schools, office buildings, meeting halls, and so forth. For establishments such as markets and malls, each kiosk is counted as one BSBTT. Information kiosk in the number of units acquired from the market manager/mall/building.
- 3) **Mix census building**, census is part of the building used for shelter and some others are used for other purposes such as

home-sewing business, home-salon, and a home-made wicker business.

43. **Census Building used for Economic Activity** if all or part of buildings used for business, including for offices, shops, storage, production processes, or services. Economic activities are activities that produce goods or services, directly or indirectly, for example: shops, offices, schools, factories, home industries, workshops, etc.

### 3.10 Household

44. **Ordinary household** is a group of people living in part or whole physical building or census, and usually live together and eat from one kitchen management. A household may consist of only one household member. The definition of a kitchen is the maintenance of their daily needs are managed as one.
