

## KATA PENGANTAR

---

Sektor konstruksi merupakan sektor ekonomi yang memiliki peranan cukup penting dalam pembangunan perekonomian Indonesia. Untuk mengetahui kinerja sektor tersebut dari tahun ke tahun, Badan Pusat Statistik (BPS) melakukan Survei Tahunan Perusahaan Konstruksi yang dilakukan secara serentak pada perusahaan konstruksi di Indonesia. Data yang dikumpulkan oleh survei ini mencakup berbagai hal mengenai kegiatan perusahaan konstruksi.

Publikasi ini menyajikan data Statistik Tahunan Perusahaan Konstruksi periode 2002 - 2006 yang meliputi karakteristik kegiatan perusahaan konstruksi, seperti jumlah perusahaan konstruksi, banyaknya pekerja dan nilai balas jasa tenaga kerja, pendapatan bruto, pengeluaran, serta beberapa jenis data lainnya yang terkait.

Akhirnya pada kesempatan ini kami mengucapkan terima kasih dan penghargaan kepada semua pihak, khususnya kepada para pengusaha dan pemimpin perusahaan konstruksi yang telah membantu kelancaran pelaksanaan Survei Tahunan Perusahaan Konstruksi tersebut.

Jakarta, Nopember 2007  
Kepala Badan Pusat Statistik,

DR. Rusman Heriawan  
NIP : 340003999

## **FOREWORD**

The Construction sector has significant role in the Indonesian economic development. In order to obtain detail information about some characteristic of this sector annually, BPS-Statistics Indonesia conducts the Annual Survey of Construction Establishments, which covers construction activities in Indonesia.

Construction statistical data presented in this publication is a series data from 2002 until 2006 resulted from Annual Construction Establishment Surveys. Data provided in this publication cover activities of construction establishments, such as the number of establishment, number of employees, employee compensation, gross output, intermediate inputs, and a number of other related data.

We would like to express our gratitude to all parties especially executives of construction establishment, who have helped in providing data for this publication.

# PENJELASAN EXPLANATION

## I. PENDAHULUAN

Data Statistik Konstruksi yang disajikan dalam publikasi ini adalah hasil Survei Tahunan Perusahaan Konstruksi tahun 2006.

Selain itu, BPS juga menyajikan hasil survei triwulanan dengan sampel yang lebih kecil dalam publikasi Indikator Konstruksi Triwulanan.

## II. RUANG LINGKUP

Survei Tahunan Perusahaan Konstruksi mencakup perusahaan konstruksi nasional yang beroperasi di Indonesia.

Maksud dan tujuan dari survei ini adalah untuk memperoleh data tentang struktur dan ciri-ciri sektor konstruksi di Indonesia, antara lain: jumlah perusahaan konstruksi, banyaknya tenaga kerja, pembentukan modal tetap, nilai dan jenis konstruksi yang dihasilkan, dan lain sebagainya.

## III. KONSEP DAN DEFINISI

### 3.1 Konstruksi

Konstruksi adalah suatu kegiatan yang hasil akhirnya berupa bangunan/ konstruksi yang menyatu dengan lahan tempat kedudukannya. Hasil kegiatan antara lain: gedung, jalan, jembatan, rel dan jembatan kereta api, terowongan, bangunan air dan drainase, bangunan sanitasi, bandara.

### 3.2 Perusahaan

Perusahaan adalah suatu badan yang melakukan kegiatan ekonomi, bertujuan menghasilkan barang/jasa, terletak di suatu bangunan fisik pada lokasi tertentu, dan mempunyai catatan administrasi tersendiri. Badan usaha perusahaan konstruksi dapat berbentuk PT, CV, Firma, PT(Per-sero), Perusahaan Umum atau Perusahaan Jawatan

### 3.5 Jenis Pekerjaan

1. Konstruksi Sipil Khusus Gedung meliputi usaha pembangunan, pemeliharaan dan perbaikan gedung yang dipakai untuk bangunan tempat tinggal, bukan tempat tinggal dan bangunan campuran.

## I. INTRODUCTION

*Construction Statistical data presented in this publication are resulted from 2006 Annual Construction Establishment Survey.*

*In addition, the quarterly survey with smaller sample size is presented in another publication, called as the Quarterly Construction Indicator publication.*

## II. THE COVERAGE

*The coverage of Annual Construction Survey includes national construction establishments which have construction projects in Indonesia.*

*The main purpose of Construction Survey is to obtain structure and characteristics data of the construction sector in Indonesia. Characteristics covered are number of construction establishment, number of employees, capital formation, value and kind of construction done etc.*

## III. CONCEPTS AND DEFINITION

### 3.1 Construction

*Construction is an activity to build building/construction that are unseparately with their location. The results of construction activities, such as building construction, road, bridge, railway and rail bridge, tunnel subway, viaduct and drainage, sanitary construction, airport building.*

### 3.2 Firm/Establishment

*Establishment is an economic activity unit to provide goods or service in a physical building, possessing cost structure and production record. Type of legality of construction establishment could be; non-profit organization, cooperative association, partnership, government's company (local and national), and private company.*

### 3.5 Kind of Construction Works

*1. Civil Construction special for Building, include all activities to build, maintain and rehabilitate of dwelling and non dwelling building.*

- a) Gedung tempat tinggal, meliputi usaha pembangunan, pemeliharaan dan perbaikan gedung yang dipakai untuk bangunan tempat tinggal, seperti rumah, perumahan dan rumah susun.
- b) Gedung bukan tempat tinggal, meliputi usaha pembangunan, pemeliharaan dan perbaikan gedung bukan tempat tinggal, seperti gedung perkantoran, pendidikan, tempat peribadatan, sarana kesehatan, penginapan, pusat perdagangan, kawasan industri/pabrik, gedung terminal/ stasiun, gedung olah raga, gedung kesenian/hiburan, bangunan gudang, hanggar dsb.
- c) Gedung Campuran: adalah kegiatan pemasangan, pemeliharaan dan perbaikan bangunan campuran, seperti rumah toko (ruko) dan rumah kantor (rukan).
- 2) Instalasi Gedung: adalah kegiatan pemasangan, pemeliharaan dan perbaikan instalasi yang berada di dalam gedung. Keegiatannya meliputi instalasi listrik, instalasi air bersih, instalasi gas kota dan instalasi sanitasi.
- a) Instalasi Listrik: adalah kegiatan pemasangan, pemeliharaan dan perbaikan instalasi listrik yang berada di dalam gedung. Keegiatannya meliputi instalasi kabel listrik, pengatur suhu udara (AC), instalasi sirene kebakaran, lift, sound system dll.
- b) Instalasi Air bersih: adalah kegiatan pemasangan, pemeliharaan dan perbaikan instalasi air bersih di dalam gedung. Keegiatannya meliputi, pengeboran sumur pompa, pemasangan pipa air, pemasangan tangki air, dll.
- c) Instalasi Gas: adalah kegiatan pemasangan, pemeliharaan dan perbaikan instalasi gas yang berada di dalam gedung.
- d) Instalasi Sanitasi : adalah kegiatan pemasangan, pemeliharaan dan perbaikan instalasi saluran pembuangan air limbah.
- 3) Instalasi bangunan sipil: adalah kegiatan pemasangan, pemeliharaan dan perbaikan instalasi bangunan sipil. Terdiri dari pemasangan dan pemeliharaan instalasi listrik jalan raya, jalan kereta api dan lapangan udara; instalasi navigasi laut dan udara; instalasi meteorologi dan geofisika; instalasi sinyal dan telekomunikasi kereta api, Termasuk kegiatan pemasangan transmisi dan jaringan telekomunikasi; dan instalasi sipil lainnya.
- 4) Pemasangan pondasi dan pilar: meliputi kegiatan
- a) Dwelling, include all activities to build, maintain and rehabilitate of dwelling, such as housing and apartment.*
- b) Non Dwelling, include all activities to build, maintain and rehabilitate of non dwelling, such as educational building, worship building, health center, office building, hotel, shopping center, industrial center/factory, bus station, sport center, art and cultural center, warehousing, airplane garage, and others.*
- c) Mixed Building, include all activities to build, maintain and rehabilitate of mixed dwelling and non dwelling, such as house-shop building and house-office.*
- 2) Building Installation: activities to install, maintain, and rehabilitate building installation. Such as electrical Installation, pure water installation, gas installation; sanitary instalation.*
- a) Electrical Installation: activities to install, maintain, and rehabilitate electrical installation. Such as electrical cable Installation, Air Conditioning, fire sirene installation, elavator, escalator, sound system etc.*
- b) Pure Water Installation: activities to install, maintain, and rehabilitate pure water installation. Such as drilling, distributing of pure water and water tank instalation.*
- c) Gas Installation: activities to install, maintain, and rehabilitate gas installation.*
- c) Sanitary Installation: activities to install, maintain, and rehabilitate waste water installation.*
- 3) Civil Construction Installation: is activities to install, maintain and services all civil construction installation. Consist of street electrical installation, railway, and airport; river, sea and flight navigation ; meteorological and geophysical installation; telecommunication installation on central telephone and telegraph, and other civil construction installation that not yet mentioned above.*
- 4) Foundation and Pile Construction: include activities to*

khusus pemasangan berbagai pondasi dan pilar gedung, jalan/ jembatan, Konstruksi pengairan/ dermaga.

*install kind of foundation and pile for building, street and bridge, harbor and irrigation system.*

5) Jaringan Air bersih: Usaha pembangunan, pemeliharaan dan perbaikan bangunan penyadap dan transmisi air baku, bangunan pengolah air baku, bangunan menara air dan reservoir air, jaringan transmisi dan distribusi serta tangki air bersih, saluran air limbah kota, jaringan drainase pemukiman, bangunan pompa, basin retensi.

*5) Water sewerage system: include all activities to build, maintain and rehabilitate all kind of tapper construction and water transmission, prime water processing, prime water tower, and water reservoir, transmission and distribution network, and pure water tank, waste water duct in town, housing drainage, pump construction, retention basin.*

6) Jaringan Gas dan Minyak: Usaha pembangunan, pemeliharaan dan perbaikan jaringan penyaluran minyak dan gas kota, meliputi pekerjaan jaringan transmisi pipa gas dan minyak pengolahan reservoir dan tangki minyak gas.

*6) Oil and Gas Network: include all activities to build, maintain and rehabilitate oil and gas processing construction, including oil and gas tapping transmission, reservoir, oil and gas tank, etc.*

7) Jaringan Listrik : meliputi kegiatan pemeliharaan dan perbaikan jaringan listrik, transmisi tegangan tinggi dan distribusi, pembangunan gardu induk, pemasangan tiang listrik, konstruksi listrik penunjang angkutan kereta api,

*7) Electrical and Telecommunication : include activities to build, maintain and repairing all kind of electrical transmission an distribution, electrical construction of train transportation.*

8) Konstruksi jalan raya dan jembatan: adalah usaha pembangunan, pemeliharaan, dan perbaikan jalan dan jembatan termasuk pagar/tembok penahan, trotoir jalan, marka jalan, rambu-rambu.

*8) Street and Bridge Construction: are activities to build, maintain and rehabilitate of street and bridge, including a barrier wall, side street for walker, traffic mark on street.*

9) Jalan dan jembatan kereta : adalah usaha pembangunan, pemeliharaan, dan perbaikan jalan dan jembatan kereta, termasuk marka jalan, rambu-rambu.

*9) Street and Bridge of Train transportation: are activities to build, maintain and rehabilitate of street and bridge train transportation, including traffic mark on street.*

10) Waduk, Bendungan dan Pengairan: meliputi usaha pembangunan, pemeliharaan dan perbaikan bendungan, waduk, jaringan irigasi, tanggul pengendali banjir, turap dsb.

*10) Irrigation system construction: include all activities to build, maintain and rehabilitate dam, reservoir, irrigation network, viaduct, etc.*

11) Pembangkit Tenaga Listrik: meliputi kegiatan pemeliharaan dan perbaikan pembangkit tenaga listrik dan konstruksi I penunjangnya

*11) Electrical Power Working: activities to build, maintain and repairing all kind of electric power working and other construction to support it.*

12) Jaringan Telekomunikasi : meliputi kegiatan pemeliharaan/perbaikan jaringan telekomunikasi, termasuk pembangunan menara telekomunikasi, pemancar/penerima radar, konstruksi antena, bangunan bumi kecil/ stasiun satelit., dan lainnya.

*12) Telecommunication network : include activities to build, maintain and repairing all kind of telecommunication network, telecommunication tower, other equipment of signal light, radar transmission, antenna construction, small station satellite etc.*

13) Konstruksi Terminal bus, Pelabuhan Laut, dan Pelabuhan Udara: adalah usaha pembangunan, pemeliharaan, dan perbaikan sarana terminal bus, dermaga, pelabuhan laut dan pelabuhan udara penahan gelombang, landasan pesawat terbang, trotoir jalan, marka jalan, rambu-rambu.

*13) Bus Station, Harbor and Airfield Construction: are activities to build, maintain and rehabilitate of bus station, harbor and airfield. Also include all bus station, harbor and airfield facilities such as sea barrier and traffic mark.*

14) Konstruksi Lainnya: meliputi usaha pembangunan, pemeliharaan dan perbaikan lainnya yang belum termasuk dalam jenis-jenis bangunan yang telah disebutkan, seperti pengerukan, pembuatan taman kota,

*14) Other Construction: include all activities to build, maintain and rehabilitate other construction that not yet mentioned above, such as dredging, city park sport field, dwelling environment, parking area, etc*

lapangan olahraga, tempat parkir, dan sejenisnya.

### **3.6 Pekerja/Karyawan**

1) Pekerja adalah semua orang yang pada saat pencacahan bekerja di perusahaan, baik pekerja teknik maupun pekerja non teknik

### **3.7 Nilai Konstruksi**

Nilai konstruksi adalah nilai pekerjaan yang telah diselesaikan oleh pihak pemborong menurut realisasi proyek yang telah diselesaikan dalam jangka waktu tertentu, berdasarkan nilai kontrak antara pemilik dengan kontraktor.

## **IV. METODE PENGUMPULAN DATA**

Pengumpulan data Survei Tahunan Perusahaan Konstruksi dilakukan secara langsung oleh petugas Badan Pusat Statistik perwakilan daerah dan atau Koordinator Statistik Kecamatan (KCK).

## **V. METODE PENGOLAHAN DATA**

Pengolahan data dilakukan secara manual dan komputerisasi. Pada tahapan manual dilakukan cek awal terhadap seluruh isian kuesioner terutama mengenai identitas apakah sudah sesuai dengan direktori yang ada. Untuk meneliti kebenaran dan kewajaran dilakukan penyuntingan dan penyandian terhadap isian kuesioner. Kemudian pada tahap komputerisasi dilakukan data entri, validasi dan tabulasi

## **VI. METODE ESTIMASI**

Angka sementara tahun 2006 diperoleh dari estimasi berdasarkan Survei Konstruksi Triwulanan. Metode estimasi dilakukan dengan cara menggunakan angka pertumbuhan (*growth*) tahun 2006 dibandingkan dengan tahun 2005.

### **3.6 Employee**

1) *Employee is any person at the time of enumeration is working in the establishment including technical worker and non technical worker.*

### **3.7 Construction Value**

*Construction value is value of work completed by contractor during a period of enumeration based on contract value on the letter of contract and project realized by contractor.*

## **IV. DATA COLLECTION METHOD**

*Data collection for Annual Construction Survey Indonesian are enumerated by BPS's staff and/or enumerator.*

## **V. DATA PROCESSING METHOD**

*Data are processed by manual and computerization system. First process was manually checking for all items in the questionnaire. Especially the identity of province, regency / municipality, establishment's name and address to be compared by the directory. The data are then edited and validated for further computer process.*

## **VI. ESTIMATION METHOD**

*Preliminary figures for 2006 are estimated from Quarterly Construction Survey. This estimation is calculated by using growth rate of some construction indicators 2006 compare to 2005*

# ULASAN SINGKAT REVIEW

## 1. Pendahuluan

Sektor konstruksi memiliki peranan yang sangat signifikan dalam pembangunan ekonomi nasional. Dapat dikatakan bahwa hampir setiap negara, baik yang sedang berkembang maupun yang telah maju menjadikan kegiatan sektor konstruksi sebagai pemacu pembangunan ekonominya. Ini karena sektor konstruksi memiliki keterkaitan yang sangat erat terhadap sektor-sektor ekonomi lainnya. Sektor industri pengolahan, sektor pertambangan non migas adalah sektor-sektor yang merupakan penyedia bahan baku konstruksi berupa produk industri (semen, besi, baja dsb) dan bahan galian berupa pasir, kapur dsb. Sedangkan sektor-sektor ekonomi lainnya, seperti pertanian, pertambangan migas dan sektor jasa-jasa merupakan pengguna hasil kegiatan sektor konstruksi yang cukup besar.

Di Indonesia, peranan sektor konstruksi terhadap pembangunan ekonomi nasional dapat dilihat dari kontribusinya terhadap Produk Domestik Bruto. Pada periode tahun 2002 – 2006 peranan sektor konstruksi terhadap PDB rata-rata sebesar 6,67%. Dari sisi lapangan kerja, peranan sektor konstruksi juga mampu menyerap tenaga kerja yang cukup besar. Ini karena jumlah perusahaan konstruksi yang beroperasi di Indonesia cukup besar, yaitu sekitar 76 867 perusahaan pada tahun 2006. Perusahaan-perusahaan ini rata-rata mempekerjakan sekitar 5 pekerja tetap per perusahaan. Selain itu pada setiap proyek konstruksi menyerap pekerja harian dalam jumlah cukup besar

## 2. Pendapatan Bruto dan Biaya Antara

Nilai pendapatan bruto sektor konstruksi sejak tahun 2002 sampai tahun 2006 selalu mengalami peningkatan. Pada periode tersebut rata-rata pertumbuhan per tahun mencapai 19,3%. Data menunjukkan, pada tahun 2002 pertumbuhan pendapatan bruto meningkat mencapai 12,1%, tahun 2003 meningkat hanya 11,4%, tahun 2004 terjadi peningkatan sangat cepat sebesar 48,0%,

## 1. Introduction

*Construction sector is one of the important economic sectors in national economic development. Most of countries, either developing or industrial countries using construction sector as a stimulator to improve their economic development. It is because there is a strong relation between construction sector and others. As we know, manufacturing and non oil & gas sector are supplied sector for construction material, while agricultural, mining and service sectors are construction's consumer sectors. Therefore, construction sector's investment has an important role due to stimulate other economic sectors then improve national economic development.*

*As well as in other countries, the sector is one of the important sector in the Indonesia economic development. It can be seen from its contribution to Gross Domestic Product (GDP). During 2002 to 2006 construction sector's contributed 6.67% to GDP averagely. The role of construction sector is also seen in absorption of labor. Construction projects employe both permanent employee and field worker which for huge projects usually absorb large number of field worker project. In 2006 the number of construction establishment was about 76867 establishments whereas each establishment employed 5 workers averagely.*

## 2. Gross output and Intermediate Input

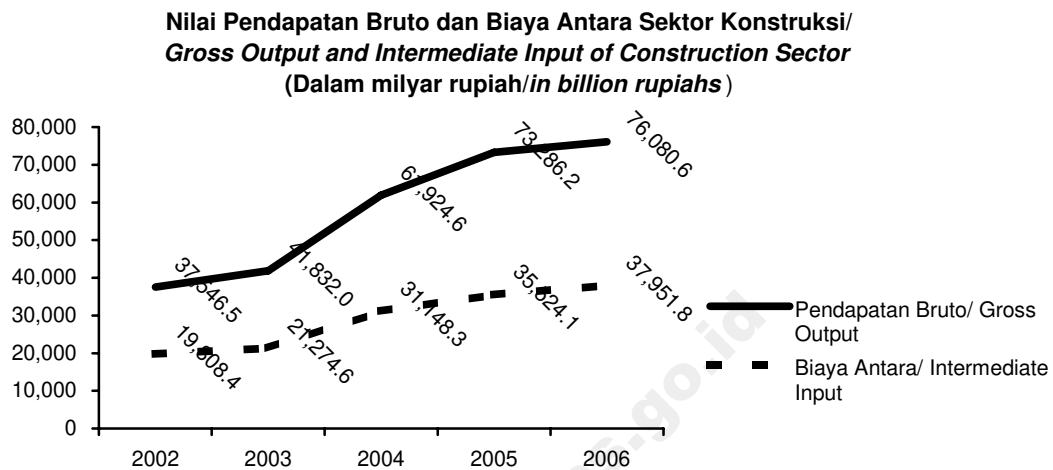

*The amount of gross outputs generated by construction companies activities during 2002 to 2006 were increasing steadily. Historical data shown that in the period, the growth rate of gross output increased 19.3% annually. In 2002 the growth of gross output increased 12.1%, in 2003 the growth rate only 11.4%, in 2004 the growth was increase rapidly 48.0%, in 2005 the growth was increase 18.3*

tahun 2005 meningkat 18,3% dan data sementara tahun 2006 diperkirakan meningkat 3,81%.

Sejalan dengan kenaikan nilai pendapatan bruto, biaya antara (biaya bahan bangunan dan bahan lainnya) juga mengalami pola yang sama, dimana pada periode tahun 2002 sampai 2006 mengalami rata-rata pertumbuhan 17,7% per tahun.

and preliminary data in 2006 increased 3.81%.

In the same direction was also happened to intermediate input (construction material and supplies). During the period, the value of intermediate input during 2002 to 2006 increased 17.7% annually.

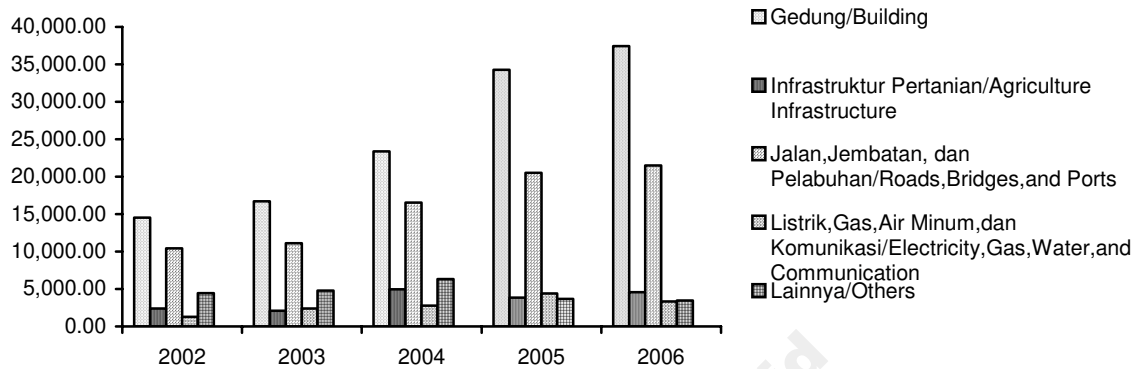

### 3. Nilai konstruksi yang diselesaikan

Besarnya nilai produksi sektor konstruksi yang telah diselesaikan selama setahun (nilai konstruksi) juga selalu mengalami peningkatan. Seperti pada tahun-tahun sebelumnya, pekerjaan konstruksi pada tahun 2006 masih didominasi oleh pekerjaan-pekerjaan gedung dan pekerjaan prasarana fisik berupa jalan, jembatan dan drainase & irigasi. Pada tahun 2006 nilai konstruksi untuk jenis pekerjaan gedung diperkirakan sebesar 37,4 trilyun rupiah atau 52,0% dari total nilai konstruksi. Pekerjaan prasarana jalan dan jembatan sebesar 29,9% dan irigasi, drainase kontribusinya sebesar 6,3%.

### 3. Construction Value Completed

The production value of construction works completed (construction value) is increasing steadily. As well as in previous years, construction works completed in 2006 was still dominated by building work, infrastructure works such as road, bridge and drainage and irrigation works. The construction value completed in the year for the type of building works was 37.4 trillion rupiahs or contributed for about 52.0% to total construction work. Infrastructure work contributed about 29.9% and drainage, irrigation work about 6.3% to total amount of construction value.

**Sebaran Nilai konstruksi Menurut Jenis Pekerjaan/  
Construction Value by Kind of Work  
(Dalam milyar rupiah/ In billion rupiahs )**

#### 4. Investasi

Menurut publikasi BKPM tentang investasi sektor konstruksi yang disetujui pemerintah, diketahui bahwa nilai investasi di sektor konstruksi sejak tahun 2002 hingga tahun 2006 mengalami peningkatan sebesar 58,5%.

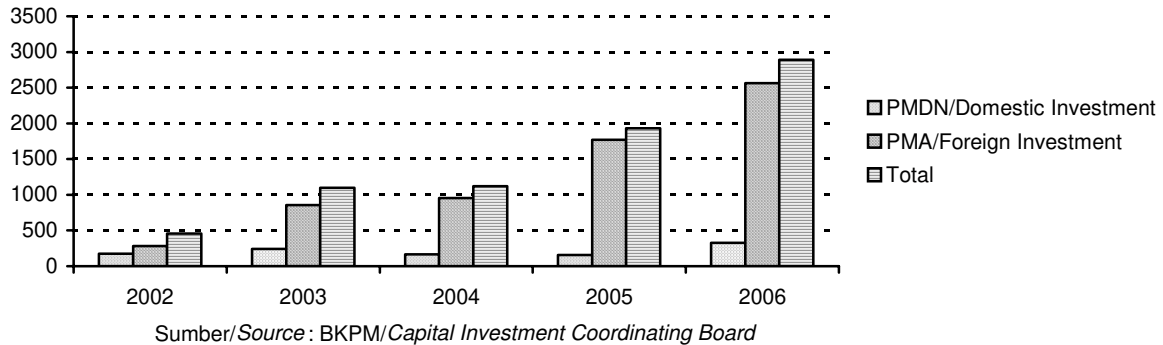

Melihat dari jenis investasinya, Penanaman Modal Asing (PMA) secara umum berkontribusi lebih besar dibandingkan Penanaman Modal Dalam Negeri (PMDN). Gambar berikut adalah nilai investasi sektor konstruksi periode 2002 – 2006.

#### 4. Investment

*According to state's finance data published by Capital Investment Coordinating Board (BKPM) known that amount of money invested in construction sector during 2002 to 2006 was increased 58.5%.*

*Concerning to kind of investment, in general construction sector investment dominated by the Foreign Direct Investment (PMA) than Domestic Direct Investment (PMDN). Investment value during 2002 – 2006 was showed by figure below.*

**Nilai Investasi Sektor Konstruksi yang Disetujui Menurut Sumber Modal/  
Approved Investment Value of Construction Sector by Source of Investment  
(Juta US \$/Million US \$)**

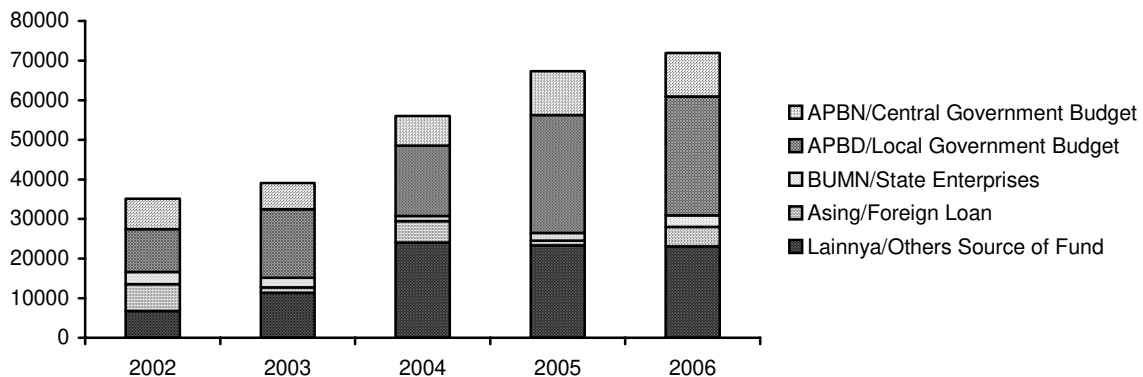

**5. Sumber pembiayaan perusahaan konstruksi**

Sejalan dengan diberlakukannya otonomi daerah proyek-proyek konstruksi yang dibiayai dari APBD meningkat secara signifikan. Pada tahun 2002 APBD berkontribusi sebesar 31,0% menjadi 44,1% pada tahun 2003 dan 31,7% pada tahun 2004. Pada tahun 2005 sebesar 44,3% dan tahun 2006 diperkirakan 41,7%.

**5. Source of Fund**

Since the law of regional autonomy conducted, the amount of fund used from APBD was increased significantly. The contribution of the APBD in 2002 was 31.0%, in 2003 and 2004 the contribution were became 44.1%, and 31.7%. In 2005 was 44.3% and 41.7% in 2006.

**Sumber Pembiayaan Proyek Konstruksi/  
Source of Fund of Construction Projects Used  
(Dalam milyar rupiah/In billion rupiahs)**

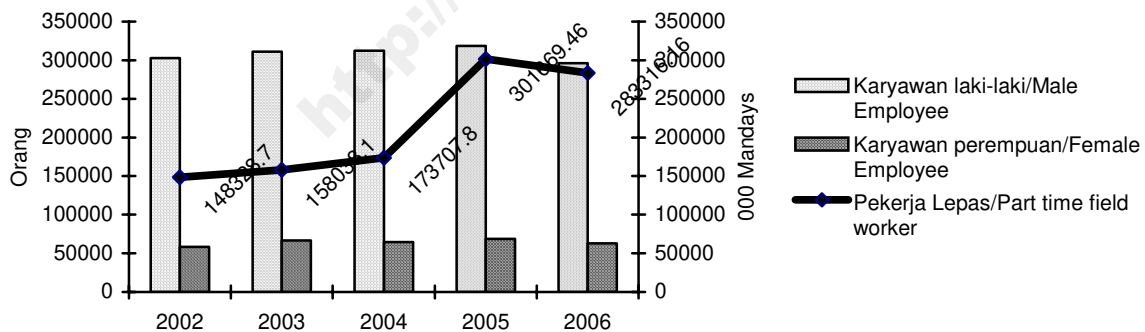

## 6. Penyerapan Tenaga Kerja

Tingkat pengangguran merupakan indikator penting dalam pembangunan ekonomi, oleh karena itu penyerapan tenaga kerja menjadi hal yang strategis dalam pembangunan. Sektor konstruksi merupakan sektor ekonomi yang berkontribusi cukup besar dalam penyerapan tenaga kerja nasional. Sebagai gambaran, jumlah karyawan tetap yang diserap pada tahun 2002 mencapai 361 ribu orang dan pada tahun 2005 naik menjadi 386 ribu orang atau naik rata-rata 2,3% per tahun. Tetapi tahun 2006 diperkirakan jumlah karyawan tetap turun sebesar 7,0% dari tahun 2005. Di samping tenaga kerja tetap, penyerapan tenaga kerja harian lepas, seperti tukang batu dan tukang kayu juga berkontribusi sangat besar. Jika pada tahun 2002 penyerapan tenaga kerja harian lepas sebesar 148,3 juta orang-hari pada tahun 2006 mencapai 283,3 juta orang-hari.

## 6. Man Power Absorption

Unemployment rate is one of important economic indicators in national development, where absorption of labor has become strategic position in national labor policy. The construction sector role in this issue cannot be ignored. In 2002 number of employee hired by construction companies was 361 thousand, and in 2005 became 386 thousand people or grow up 2.3% per year averagely. But number of employee in 2006 decreased 7.0% than in 2005. Another kind of labor in construction sector is field worker, such as stone-man, carpenter etc. In the year 2002 number of the kind of labor absorbed was 148.3 million man-days and increased reached 283.3 million man-days in 2006.

**Jumlah Pekerja Tetap dan Pekerja Harian Lepas/  
Number of Employee and Part-time field workers**

Kualitas sumber daya manusia sektor konstruksi mengikuti kemajuan teknologi dan ilmu pengetahuan. Peningkatan jumlah karyawan tetap yang diserap sektor konstruksi diikuti oleh tingkat pertumbuhan karyawan yang lulus pendidikan tinggi yang lebih besar dibanding yang berpendidikan dasar dan menengah.

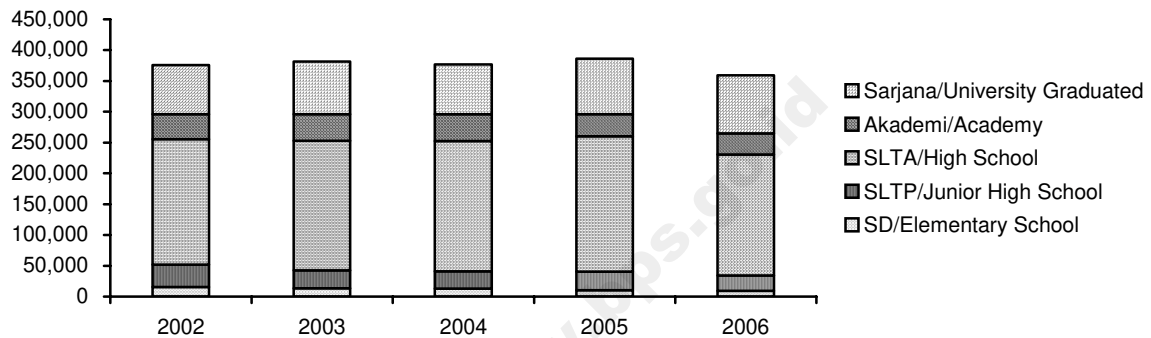

As well as progressing of science and technology, number of skilled employee hired by construction companies was greater than unskilled employee. This condition showed by growth of skilled employee which higher growth than the other.

The number of employee graduated from

Pada tahun 2002 jumlah tenaga kerja tetap berpendidikan akademi dan universitas sebesar 113,4 ribu orang, pada tahun 2006 naik menjadi sekitar 128,5 ribu orang. Ini berarti pekerja tetap berpendidikan perguruan tinggi tumbuh sekitar 3,2% per tahun. Di lain pihak, jumlah tenaga kerja tetap berpendidikan dasar dan menengah sebesar 247,9 ribu orang pada tahun 2002 turun menjadi sekitar 230,6 ribu orang pada tahun 2006 atau menurun sekitar 1,8% per tahun.

*university level in 2002 was 113.4 thousand then increased became 128.5 thousand in 2006. This means that during 2002 to 2006 number of employee graduated from higher education was increased 3.2%. On other side, number of employee graduated from lower education level during the period decreased from 247.9 thousand in 2002 became 230.6 thousand in 2006, or decreased about 1.8% per year.*

**Jumlah Tenaga Kerja Menurut Pendidikan yang Ditamatkan/  
Number of Employee by Formal Education Graduated**
