KATA PENGANTAR

Publikasi “Statistik Potensi Desa 2005” merupakan penerbitan kesembilan dari hasil pendataan potensi desa (Podes). Data yang ditampilkan berasal dari sekitar 70 ribu desa/kelurahan atau pemerintahan setingkat desa di seluruh Indonesia. Publikasi pertama yang diperoleh dari kegiatan serupa, dipublikasikan tahun 1980. Pengumpulan data Podes tidak terlepas dari kegiatan sensus, baik Sensus Pertanian, Sensus Penduduk maupun Sensus Ekonomi.

Sebagaimana pada publikasi sebelumnya, informasi yang dikumpulkan berasal dari hasil wawancara dengan kepala desa/kelurahan atau yang mewakili maupun dari instansi terkait. Informasi yang dikumpulkan pada pendataan Podes ini mencakup data tentang keterangan umum desa, kependudukan dan ketenagakerjaan, perumahan dan lingkungan hidup, fasilitas pendidikan, fasilitas kesehatan, sosial budaya, hiburan, rekreasi, olahraga, angkutan dan komunikasi, politik dan keamanan, perdagangan dan industri, serta keterangan kepala desa/lurah. Berhubung luasnya informasi yang dicakup, maka pada publikasi ini agregasi data yang disajikan hanya sampai tingkat provinsi (untuk Publikasi Nasional). Informasi yang lebih rinci per kabupaten/kota dapat diperoleh dari publikasi pada masing-masing tingkat provinsi yang bersangkutan.

Diharapkan publikasi ini dapat menjadi rujukan bagi para perencana pembangunan di Pusat maupun di Daerah, peneliti, akademisi serta pemakai data umumnya. Khususnya bagi Pemerintah Daerah dapat digunakan sebagai bahan evaluasi hasil pembangunan.

Disadari bahwa dalam publikasi ini masih banyak kelemahan dan ketidaksempurnaan. Kritik dan saran bagi penyempurnaan publikasi ini dimasa datang, sangat diharapkan.

Preface

The 2005 Village Potential Statistics (Podes) is the ninth publication covering seventy thousand villages or similar administration level in all over Indonesia. Since its first publication, in 1980, Podes data collection has always been associated with census activities either in Agricultural, Population or Economic Census.

Like the previous publication, the information of 2005 Podes, collected from villages or other related institution, consists of general information, demography and labour force, housing and environment, educational facilities, health facilities, socio-cultural, entertainment, recreation, sports, transportation and communication, politics and security, trade and industry, and general information on the head of villages. Due to a wide variety of information covered, the present publication is the aggregate of data up to the provincial level (for National Publication). Thus, detail information on the district level will be presented through provincial-level publication.

It is expected that this publication could be regarded as reference as well as sources of data for development planners, researchers, scholars or others. Podes data of this publication is also be expected to be used for the purpose of evaluating development carried out in and by local government.

Lastly, as has been fully aware that this publication is not free from sufficient, therefore comment as well as suggestion is always welcome to improve the content of next Podes.

BAB I PENDAHULUAN

CHAPTER I PREFACE

1.1. Latar Belakang

Otonomi daerah diberlakukan sejak tahun 2001 mempunyai implikasi keleluasaan daerah dalam mengelola manajemen wilayah. Keperluan data statistik wilayah kecil yang komprehensif semakin dibutuhkan guna membantu perencanaan program daerah yang tepat sasaran. Kebijakan lokal yang menjadi wewenang daerah makin terarah dengan semakin lengkapnya informasi mikro. Apalagi sejak krisis ekonomi, pergantian pimpinan nasional, perubahan politik, maupun terakhir dengan perubahan sistem keuangan dalam pembiayaan pembangunan, penyelenggaraan pemerintahan desa/kelurahan akan dapat dipantau dari informasi semacam ini.

Informasi yang mempunyai skala luas dan detail sampai unit administrasi terbawah dapat dijumpai dalam publikasi Potensi Desa tahun 2005 (Podes). Pengumpulan data dilakukan pada Mei 2005 yang merupakan bagian pelaksanaan Sensus Ekonomi 2006. Penyelenggaraan Podes selalu mengikuti kegiatan Sensus, yaitu Sensus Penduduk, Sensus Pertanian dan Sensus Ekonomi.

1.1. Background

The regional autonomy, which has been implemented since 2001, lead to the local government to be free in managing their region. The comprehensive statistical data on small area is therefore importantly needed to help plan the regional program correctly. The local government will be more focused by the availability of micro information. Moreover, the impact of some incidents like economic crisis, the change of national leader, political reformation, or modification of budget system of financing development, to the village government can be easily monitored.

The large-scale information of Indonesia area and detail information of lowest administration unit can be found in the publication of the 2005 Village Potential Statistics or Podes. The ninth publication, which was collected in May 2005, was part of the 2006 Economic Census. The publication of previous Podes, with its first publication was published in 1980, and it is always associated with

Dilihat dari skala cakupan yang dapat memberi informasi sampai wilayah terkecil, maka informasi semacam ini merupakan *small area statistic* yang masih jarang dilakukan oleh pihak lain. Pelaksanaan Podes sebelumnya yang dilakukan sejak 1980 mencakup kurang lebih 186-493 variabel, sedangkan Podes 2005 terdiri dari 298 variabel. Karena luasnya cakupan, maka tidak seluruh informasi baik wilayah maupun variabel dapat ditampilkan. Publikasi ini disajikan sampai tingkat provinsi dan kabupaten/kota, sedangkan informasi yang lebih rinci dapat diperoleh di BPS.

Pengumpulan data pada pelaksanaan Podes dilakukan secara sensus, mempunyai ciri khas yang sedikit berbeda dengan sensus yang lain. Sensus lain seperti Sensus Pertanian dan Sensus Ekonomi kegiatannya tidak murni sensus, tetapi hanya berupa sensus *sample*. Podes dan Sensus Penduduk, merupakan sensus murni (sensus lengkap). Namun demikian dilihat dari unit pengamatannya, Podes juga berbeda dengan Sensus Penduduk,. Jika pada sensus penduduk setiap penduduk tidak luput dari penelitian, maka pada Podes unit observasinya adalah setiap desa/kelurahan

census activities namely Population Census, Agriculture Census and Economic Census.

Looking at the scale of data coverage, which informs the smallest area, the Podes has been rarely done and has not been possessed by other institution. The number of variables included in the Podes since 1980 was about 186 up to 493 variables, while in the 2005 Podes is about 298 variables. Nevertheless, due to a wide coverage of area, not all information about regional and variables can be presented. This present publication published up to the provincial level. The more detailed information can be found in BPS Province offices.

As has been recognized that the Podes is collected with the census system. However, Podes has different characteristics compared with other censuses. Other censuses like agricultural census, economic census are undertaken as sample census, while Podes is pure census (complete enumeration). In addition, the unit observation of Podes is village, while individual is used for other censuses. Unlike other censuses that are held every ten-year, Podes is conducted every 3 years. Thus, Podes can be regarded as the most

Perbedaan lainnya, kegiatan sensus diadakan 10 tahun sekali, tetapi pada podes diadakan setiap sekitar 3 tahun.

1.2. Tujuan.

Publikasi ini mempunyai tujuan menyajikan informasi global/agregat dari kegiatan statistik pada wilayah kecil, dan dapat merupakan informasi awal bagi penelitian lebih lanjut. Secara lengkap tujuan publikasi seperti berikut:

1. Menginformasikan tentang potensi/fasilitas/keadaan pembangunan di desa/kelurahan yang meliputi keadaan sosial-ekonomi, sarana dan prasarana infrastruktur yang ada di wilayah administrasi terbawah.
2. Menyediakan data untuk dasar perencanaan regional (*spasial*) dan sekaligus informasi pencapaian pembangunan di desa/kelurahan.
3. Menyediakan data pokok bagi penyusunan statistik wilayah kecil (*small area statistics*).
4. Sebagai informasi awal bagi keperluan penyusunan ringkasan statistik seperti: penyusunan monografi desa, dasar pembentukan indeks komposit, penyusunan peta geografis (*Geographic Information System*) dan sebagainya.

completed source of information.

1.2. Purpose

The purpose of this publication is to present the general information of statistical activity on small area and to provide initial information for further study. The detail purposes of this publication are as follow:

1. *To inform information on potential, facility, and development in village which include socio-economic condition, infrastructure facilities available in the lowest administration area.*
2. *To provide database for regional/spatial planning as well as information on the development achievement in village level.*
3. *To provide core data for composing small area statistic.*
4. *To provide initial information for reviewing statistical summary such as village monograph, data base for calculating composite index, and geographical map.*

1.3. Sistematika Penyajian

Publikasi Statistik Potensi Desa 2005 terutama menyajikan tabel-tabel per provinsi, kabupaten/kota yang merupakan hasil rekapitulasi pengolahan seluruh potensi desa/kelurahan se Indonesia. Penyajian secara lengkap sebagai berikut. Bab pertama disajikan latar belakang, tujuan dan sistematika penulisan. Bab kedua menampilkan ruang lingkup, jenis data yang dikumpulkan serta metode pengumpulan/pengolahan data. Kemudian mengenai konsep dan definisi dari variabel/informasi yang dikumpulkan dapat dibaca pada bab tiga. Bab empat, merupakan inti publikasi ini, berisi tabel-tabel hasil pengolahan seluruh informasi potensi desa 2005.

1.3. Outline

The 2005 Podes presents provincial tables that were recapitulated from all villages in Indonesia. This publication is divided into four chapter. The first chapter presents background, aim and outline. The next chapter discusses coverage of study, type of data collection, and methodology and method of data processing. The third chapter shows the concept and definition of variable or information collected. Finally, as the core publication, some tables resulted from processing of all village will be depicted in the fourth chapter.

BAB II. RUANG LINGKUP DAN METODOLOGI

2.1. Ruang Lingkup

Pengumpulan data Podes 2005 mencakup seluruh desa/kelurahan atau wilayah administrasi yang setingkat desa termasuk nagari di seluruh Indonesia. Data yang dikumpulkan adalah data keadaan pada Mei 2005. Sedangkan menurut referensi waktu dapat dibagi periode saat ini, setahun yang lalu, maupun periode tiga tahun yang lalu. Menurut frekwensi dibagi dalam katagori “sebagian besar”, “biasanya”, ”terbanyak” dan sebagainya.

Dalam publikasi ini, tabel yang serupa dibagi dalam 3 katagori, yaitu tabel untuk desa perkotaan, tabel untuk perdesaan dan tabel perkotaan+perdesaan. Kriteria **desa perkotaan** ditentukan dari beberapa ciri, yang biasanya berbentuk kelurahan dan wilayahnya berada di kota. **Desa perdesaan** adalah wilayah desa yang lebih bercirikan agraris dan umumnya berada diluar/jauh dari daerah perkotaan.

Selain desa dan kelurahan, juga dicacah adalah Unit Pemukiman Tranmigrasi (UPT), Satuan Pemukiman Transmigrasi (SPT), Pemukiman Masyarakat Terasing (PMT). Mengenai UPT/ SPT dan PMT yang dicacah adalah yang berada dalam pengelolaan
